

No.	Title	Authors
1	New Classes of Volterra Integral Equations of the First Kind Related to the Modeling of the Wind Turbine Dynamics	S. V. Solodusha
2	On Certainty Equivalence Property in Deterministic LQ-problems with Random Initial Data and Information Constraints	Dmitriy Rumyantsev, Kirill Tsarkov
3	Bang-Bang Extremals in Sub-Finsler Problems on Engel Group	Yuri Sachkov
4	Motion Control of Space Robot at an Inspection of Geostationary Satellite State	Yevgeny Somov, Sergey Butyrin, Sergey Somov
5	On Stability of Periodic Selector-Linear Differential Inclusions with Asymptotically Stable Sets	Mikhail Morozov
6	Stability Analysis for Nonlinear Mechanical Systems with Non-stationary Potential Forces	A. V. Platonov
7	Construction of Lyapunov–Krasovskii Functionals for Nonlinear Mechanical Systems with Delay	Alexander Aleksandrov
8	On the Condition of Complete Controllability of Stage-by-Stage Changing Linear Dynamic Systems with Varying Dimension of the Control Vector	V. R. Barseghyan
9	On the works of M. P. Kharlamov on the phase topology of the Kowalevski top in two constant fields	Pavel E. Ryabov
10	Autonomous Guidance and Attitude Control of Information Satellite	Yevgeny Somov, Sergey Butyrin, Tatyana Somova
11	Control of Anticipation and Delay in the Problem of Shock Isolation of an Object on a Movable Base	V. A. Korneev, S. V. Udin
12	Anticipation and Delay for a Constant-force Control in the Problem of Protection of an Object on a Movable Base from an Impact	V. A. Korneev
13	Switched linear system stabilization under parametric uncertainty	Andrey Fursov, Yulia Mosolova
14	Feedback Synthesis for UAVs Based on the Control Hierarchy Method	Yulia G. Kokunko, Svetlana A. Krasnova, Svetlana V. Pivneva
15	Analysis and Optimization of Rotation of an Elastic Loaded Link with an Electric Drive	Georgy Kostin
16	Double-Frequency Averaging in the Dynamical Model of a Double-Rotor Wind Turbine	Marat Dosaev, Liubov Klimina, Boris Lokshin, Ekaterina Shalimova, Ching-Huei Lin
17	On the Application of the Averaging Method in the Problem of Lorentz Stabilization of a Satellite on a Slightly Inclined Orbit	Alexander Yu. Aleksandrov, Alexey A. Tikhonov
18	Tracking problem with consideration of physical restrictions on phase variables and controls	Svetlana Gulyukina, Victor Utkin
19	Both Necessary and Sufficient Global Optimality Conditions for Discontinuous Dynamical Systems	Mikhail Khrustalev
20	Polynomial-Based Trajectory Planning for Affine Dynamical Systems under State and Input Constraints	Alexey E. Golubev, Nadezhda V. Utkina
21	On Empirical Model of Aerodynamic Torque Acting on Savonius Rotor	Anna Masterova, Yury Selyutskiy, Alexander Zubkov, Rinaldo Garziera
22	Self-sustained oscillations of a double aerodynamic pendulum	Andrei Holub, Yury Selyutskiy, Shyh-Shin Hwang
23	Investigation of nonlinear oscillations of near-autonomous Hamiltonian systems in the cases of multiple parametric resonances	Olga Kholostova
24	Synthesis of a robust control system for an unstable plant using QFT	Yuri Mitrishkin, Svetlana Ivanova
25	Dynamic Feedback Synthesis in Tracking Single-Channel Systems under the Influence of Uncontrolled Disturbances	Dmitriy V. Krasnov
26	Simultaneous Providing of Stability Margins Under Parametric Uncertainty and at a Plant Input/Output	V.N. Chestnov, D.V. Shatov
27	Two-cascade multiloop control system of a plasma shape in a tokamak with decoupling and robust PID-controllers	Y. V. Mitrishkin, V. I. Kruzhkov

28	Block Approach to Controlling a Twin Rotor Electromechanical System	A.S. Antipov and S.A. Krasnova
29	Pendulum Motions of a Spacecraft Equipped with a Solar Sail and Tethered to a Heliocentric Space Station	Alexander V. Rodnikov
30	Estimation of Stochastic Multistage Inclusions in Denumerable Sets	Boris Ananyev
31	The comparison of approaches to estimating speed from position measurements in Van Der Pol-Duffing system	Olga Tkacheva, Marina Vinogradova, Anton Utkin
32	Influence of shape of blades upon descent of a finned body in media	Yury Okunev, Olga Privalova, Vitaly Samsonov
33	The influence of the average frequency of oscillations of the Earth's pole on the accuracy of predicting its position	Vadim Perepelkin, Dmitry Rumyantsev
34	Anisotropic Estimator Design for Time Varying System with Measurement Dropouts	Arkadiy Kustov, Alexander Yurchenkov
35	About Synchronization Problem of Group of Weakly Coupled Identical Oscillators	Andrey Galyaev, Pavel Lysenko
36	Optimal pulse stabilization of autonomous linear systems of differential equations with aftereffect	Yurii Dolgii, Alexander Seseikin
37	On a Polyhedral Method for Solving an Evasion Problem for Linear Discrete-Time Systems	Elena K. Kostousova
38	Periodic Regimes of Motion of a Chain of Interacting Bodies in a Medium with Resistance	Dmitri Knyazkov, Tatiana Figurina
39	Control of the robot-wheel with a pendulum	Ivan Matrosov, Yury Morozov, Alexander Pesterev
40	Time-optimal movement of an elliptical pendulum	Oleg Kayumov
41	On the attitude control of an electrodynamic tether system interacting with near-Earth plasma	Alexey A. Tikhonov, Andrey B. Yakovlev
42	Application of the Kovacic Algorithm to the Problem of Motion of a Heavy Rigid Body with a Fixed Point in a Hess Case	Alexander S. Kuleshov
43	Kulakov's Method of Bilateral Remote Control of a Space Manipulation Robots	G. V. Alferov, P. A. Efimova, V. S. Korolev, D. V. Shymanchuk
44	Biologically inspired optimization algorithm in satellite attitude control problems	Anna Okhitina, Dmitry Roldugin, Stepan Tkachev
45	Analysis of systems with non-negative variables using the localization method	Alexander P. Krishchenko, Elena S. Tverskaya
46	New criteria for gradient-like behavior of synchronization systems with distributed parameters	Vera B. Smirnova, Anton V. Proskurnikov, Ella E. Pak, Roman V. Titov
47	Control of a Bilinear System in Conditions of Uncertainty	Tatiana F. Filippova
48	Leonov's method of nonlocal reduction for pointwise stability of phase systems	Vera B. Smirnova, Anton V. Proskurnikov, Natalia V. Utina
49	Stabilization of steady motions of systems with geometric constraints and cyclic coordinates	Anastasia Ilyina, Alexander Krasinskiy
50	A Nonlinear Model of Heat Transfer for Cylindrical Bodies Controlled by a Thermoelectric Converter	Alexander Gavrikov, Georgy Kostin
51	On Applicability of Linearization Approach in Calculating Small-time Reachable Sets of Nonlinear Control Systems	Mikhail Gusev
52	A variational approach to modeling and optimization of the dynamics for an elastic beam with variable cross section	Vasily Saurin, Vladimir Poliakov
53	Control of a system of two interacting bodies on a rough inclined plane	N. N. Bolotnik, T. Yu. Figurina
54	On Calculation of σ -entropy Norm of Continuous Linear Time-Invariant Systems	Victor A. Boichenko, Alexey A. Belov
55	Stabilization of Constrained Nonlinear Triangular Delay Systems Using Convex Optimization	Natalia Sedova, Olga Druzhinina
56	One approximation in the optimal stabilization problem for the system of periodic delayed differential equations	R. I. Shevchenko

57	Adaptive optimal robust tracking of discrete-time minimum-phase plant under biased disturbance	Victor Sokolov
58	Modeling and Optimization for Oriented Growing Solids	Sergei Lychev, Konstantin Koifman, Anton Petrenko, Dmitry Bout
59	Observer for a pacemaker model based on the van der Pol equation	A.N. Kanatnikov, O.S. Tkacheva
60	Mathematical Models of a Solar Sail Spacecraft Controlled Motion	V. S. Korolev, E. N. Polyakhova, I. Yu. Pototskaya, N. A. Stepenko
61	Planning a motion of a wheeled robot controlled by a motion of internal mass	Petr Makhmudov, Vitaliy Samsonov, Marat Dosaev, Liubov Klimina, Yuriy Vershinin
62	On Finding Switching Instants for Control of Discrete-time Dynamical Polysystems by Using Continued Fractions	Sergey Khryashchev
63	Optimality Conditions for Impulsive Processes with Intermediate State Constraints	Olga Samsonyuk, Stepan Sorokin
64	The stationary optimal control in combined discrete and continuous system	Vladimir Poliakov, Vasily Saurin
65	Controlled Motion of a Platform with Elastic Elements	Igor Ananievski
66	On the Solvability of Linear Matrix Inequalities under Quadratic Constraints	Lev Rapoport, Timofey Tormagov
67	Stability Conditions for Systems with Switching Between Four Linear Discrete Subsystems	Vladimir Kamenetskiy
68	Control of a Mechanical System Based on the Constraint Stabilization Technique	Alexander Pesterev, Ivan Matrosov, Yury Morozov
69	A Family of Oscillations That Connects Equilibria	V.N. Tkhai
70	On the Trajectory Tracking Control of a Wheeled Mobile Robot Based on a Dynamic Model with Slip	Aleksandr Andreev, Olga Peregudova
71	The Direct Lyapunov Method in the Motion Stabilization Problems of Robot Manipulators	Aleksandr Andreev, Olga Peregudova
72	Anisotropic Norm Computation for Time-invariant Random System	Arkadiy Kustov, Victor Timin, Alexander Yurchenkov
73	Local Solvability of Control Systems with Implicit Dynamics	Aram V. Arutyunov, Zukhra T. Zhukovskaya, Sergey E. Zhukovskiy
74	Equilibrium in continuous dynamic market models	Natalya Pavlova, Zukhra Zhukovskaya, Sergey Zhukovskiy
75	Observer Based Decentralized Control for Interconnected Systems with Uncertain Disturbances	Alexander Malikov
76	Sufficient Epsilon-Optimality Conditions for Stochastic Systems Driven by Non-Poisson Impulses	Konstantin Rybakov
77	Controllability of the satellite stabilized by magnetic torques	Morozov V.M., Kalenova V.I.
78	On Extremal Controls in the Sub-Riemannian Problem on the Group of Rigid Body Motions	Alexey Mashtakov
79	Variable Dimension Block Method for Solving the Big Data Problem in Geophysics	Inna Stepanova, Anton Salnikov, Alexey Batov
80	Modeling and Optimization of the Shape of Contacting Solids at Finite Deformations	Tatiana Lycheva, Sergey Lychev
81	Sufficient conditions for stability of the equilibrium position of an impulsive system	Oleg Anashkin, Olga Yusupova
82	Resonant Oscillations of the Coupled Controlled System Near Equilibrium	Ivan Barabanov, Valentin Tkhai
